Energy Learning Network

Community Energy Scotland's Role

- To support new and existing community-led energy projects to reach their potential and scale their impact
- Strengthen our online resources to support the needs of CE organisations and those wishing to enter the sector
- Develop a programme of training and networking events
- Use evidence from the State of the Sector report and other members' feedback to shape our plans and delivery
- Strengthening our partnerships with other enabling organisations, local authorities and decision makers to ensure community energy can flourish

Energy Learning Network

Wider Context

- UK-wide online events – CES shares all event information with members & on social media
- Develop pathways for emerging community energy groups with ambitions to grow
- Shared learning and networking opportunities
- Letting people know Community Energy is a possible solution
- Complement the work of local authorities and climate change groups
- Free peer mentoring services for members
